Hello, my name is **Filip Karika**, and I am **22** years old. I am a junior in the field of **computer engineering**, and my greatest passion is **programming**. Ever since I was a child, I dreamed that one day my programs would make the world a better place. That's why, after high school, I decided to stay in the field and continue improving. I am currently a **second-year** student at **Unicorn University** in **Prague**, enrolled in the Software Development program. Since I have been involved in the IT world since I was 15, I am ready to apply my knowledge and dedication to professional IT development.
